

# PERMANENT SUPREME

## Intensive grazing and late silage production

- A dense, productive, long-term, intensive grazing mixture, designed to give the option of taking later cuts of top-quality silage
- A highly palatable, very digestible ley that will give maximum dry matter intake, with a blend of perennial ryegrass and optional white clover

### Key benefits

- Delivers a long grazing season which matches demand from turnout to late autumn
- Increased milk yields
- Produces a dense, leafy, persistent and easily managed ley that delivers highly palatable and digestible grass. Although a grazing mixture, there is the option of taking later cuts of top quality silage if required
- WHITE CLOVER option is very palatable and highly nutritious, nitrogen fixating and increased protein content
- GRACEHILL - the best-performing late-heading perennial ryegrass variety across recommended lists and the highest-performing late heading perennial ryegrass available according to the 2021/2022 PPI list, producing a net profit of €222/ha/ year. Shown to particularly excel in autumn growth and silage yield
- NEW BALLYVOY brings high spring growth to the product, comparable with many much earlier heading varieties
- Contains only recommended list varieties

### When to sow

Sow when soil temperature is above 8°C; clover will germinate at 10°C.

### When to graze & cut

Designed for intensive grazing between early summer and autumn, with the aim of providing balanced production from turnout to late autumn, to match traditional cattle turnout times, for season-long grazing. The later maturing crop will also match well with environmental schemes stipulating silage cannot be made before July.

### Available without clover

## Recommended Grass List

Barenbrug UK is a leading organisation within the Recommended Grass and Clover lists, which are drawn up after rigorous testing for attributes such as yield, persistency, quality and disease resistance. With data coming from Barenbrug UK's own trial site, Cropvale, and evaluated by a panel of experts, these lists can help to decide which variety will suit your requirements. ## England & Wales and Northern Ireland

1.50kg NEW *Ballyvoy* (Late Perennial Ryegrass Dip.)  
4.00kg *Glenarm* (Late Perennial Ryegrass Dip.)  
1.50kg NEW *Dundrod* (Late Perennial Ryegrass Dip.)  
3.00kg *Youpi* (Late Perennial Ryegrass Tetr.)  
3.00kg *Gracehill* (Late Perennial Ryegrass Tetr.)  
1.00kg *Prota White* (White Clover)

## Scotland

5.00kg NEW *Ballyvoy* (Late Perennial Ryegrass Dip.)  
3.00kg *Gracehill* (Late Perennial Ryegrass Tetr.)  
1.00kg *Prota White* (White Clover)  
1.00kg NEW *Baronaise* (Timothy)  
5.00kg NEW *Dundrod* (Late Perennial Ryegrass Dip.)  
(Pack size 15kg)

## Specifications

Sowing rate per acre	14kg per acre
Sowing depth	Up to 10mm
Soil temperature	>8°C
Grazing height	1500kgDM/ha ~8cm
Pack size	14kg
