

## PROTA WHITE

### White Clover Blend

- PROTA WHITE is a blend of white clovers, which gives better animal performance, higher milk yields and better live weight gains.
- It also produces a better quality sward with fewer weeds and less disease
- It has an exceptionally long growing season and 'fixes' nitrogen from the atmosphere for maximum production

- Exceptionally long growing season
- Fixes free nitrogen from the atmosphere, up to 150kg N/ha
- By using a blend of different varieties there is something best suited to whatever the management being applied to the sward
- Animals prefer to graze a clover / grass sward - this results in higher voluntary intakes and better animal performance

#### Key benefits of including clover

Clover offers remarkable environmental and sustainability benefits as well as a highly productive, nutrient and protein rich forage for livestock.

- Higher quality pasture under low fertiliser
- Improves digestibility
- Fix up to 200kg N/ha/year White clover offers a mid-season high protein sward
- Improves grass health and resilience against disease Increased intakes resulting in higher milk yields and daily liveweight gain
- Reduce bought in nitrogen and leave residual nitrogen for a subsequent crop
- Improved soil health
- Promotes pollinators and insects

#### Top tip

Always maintain a soil pH of at least 6.0 and P & K indices of 2 for optimal clover content and health.

### Specifications

Sowing rate/acre	1 kg/acre
Pack sizes	5kg or 25kg

## Recommended Grass List

Barenbrug UK is a leading organisation within the Recommended Grass and Clover lists, which are drawn up after rigorous testing for attributes such as yield, persistency, quality and disease resistance. With data coming from Barenbrug UK's own trial site, Cropvale, and evaluated by a panel of experts, these lists can help to decide which variety will suit your requirements. Visit our recommended grass seed pages to see the latest lists.
