BAR FINISHER

Mix of chicory, white clover, red clover and plantain

- Highly palatable, providing excellent feed for high live weight gains
- Provides high quality feed through summer that recovers quickly after grazing

Producing a leafy, high quality feed over spring, summer and autumn when traditional pastures can decrease in quality, BAR FINISHER can be used as a six month or two-year crop depending on the farm system and grazing management approach.

Clover in the mix will provide nitrogen to feed the crop, also filling space not occupied by herbs. The red clover component, alongside the herbs, will provide high quality feed through a dry season, helping to reduce risk in summer dry areas.

Advantages

- Highly palatable, providing an excellent feed for high live weight gains
- High quality summer feed that recovers quickly after grazing
- High protein option for dairy farmers
- Clover provides fixed nitrogen
- High mineral content, particularly zinc, potassium and copper

Specifications

Sowing rate	5kg/acre
Pack size	10kg

Composition

3.00kg	Prota Red	Red Clover Blend
2.00kg	Prota White	White Clover Blend
3.00kg	Tonic	Plantain
2.00kg	Commande	Chicory
